FIBREGLASS pools

Calypso

Calypso pools are one of the most popular family swimming pools. Thanks to the materials and technologies used, they are extremely strong but elegant and highly-developed. An indisputable advantage of these pools is their monolithic design. The integrated inner steps and the range of surface colour design will appeal to every customer.

FIBREGLASS pools

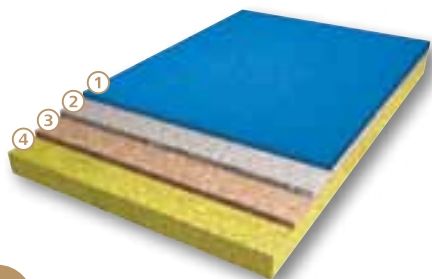

Calypso

Advantages of Calypso pools

- ▶ Strong construction
- ▶ Monolithic design
- ▶ Integrated steps (totally within the pool)
- ▶ High quality surface and thermal insulation
- ▶ Easy construction preparation
- ▶ Easy mounting

High Quality Surface and Thermal Insulation

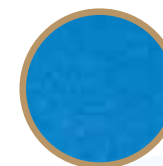

Inner surface of the pool coated with a special Aqua-Guard paint. It provides an elegant design, strong protection against UV radiation and strong protection against chemical action. The external surface consists of a layer of hardened polyurethane foam, providing excellent thermal insulation and high strength.

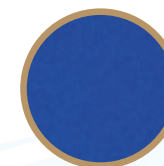

- ① Colour Aqua-Guard with upper protective layer
- ② Layer of vinyl-ester resin
- ③ Reinforcement of fibreglass (laminated glass)
- ④ Thermal insulation (hardened PUR foam)

STEEL pools

Ibiza

Ibiza pools have been the most popular family swimming pools for a long time. Their popularity is due to the high quality of materials used and their elegant design, highlighted by the colourful mosaic of the wall. Thanks to its regular shape it can be easily combined with the pool enclosure, model Trend. The pool wall thickness is 0.8 mm and the pool liner thickness is 0.5 mm.

Swimming pool construction

The walls of the swimming pool are assembled from thick-walled zinc-coated metal plates, which, in addition, are protected by a special anticorrosive plastic layer and therefore represent a guarantee of the long-term operating lifetime of the swimming pool inserted in-ground. A high quality liner with a UV stabilizer forms the inner face layer of the swimming pool.
